

The FrenchCreek M-CSKIT-25 features the following components:

- TP7 - 7' Tripod with aluminum legs, safety chain and non-slip rubber feet.
- MW50G - 50' Galvanized Steel Cable rescue winch w/pulley & bracket.
- RL25AG - 25' Self-Retracting Lifeline w/carabiner for mounting.
- 204 & 206 - Winch/SRL carry bag and Tripod carry bag.

We offer this FrenchCreek system as an alternative to the Miller 51-CSE/System.

The main differences are as follows:

- The Miller system features a winch enclosed in a housing which provides protection and durability.
- However, the FrenchCreek system winch offers easier visual inspection and is lighter weight. In addition, the FrenchCreek system includes a 25' SRL that the Miller system does not come with.
