AB104A13

Contractor Model Full Body Harness

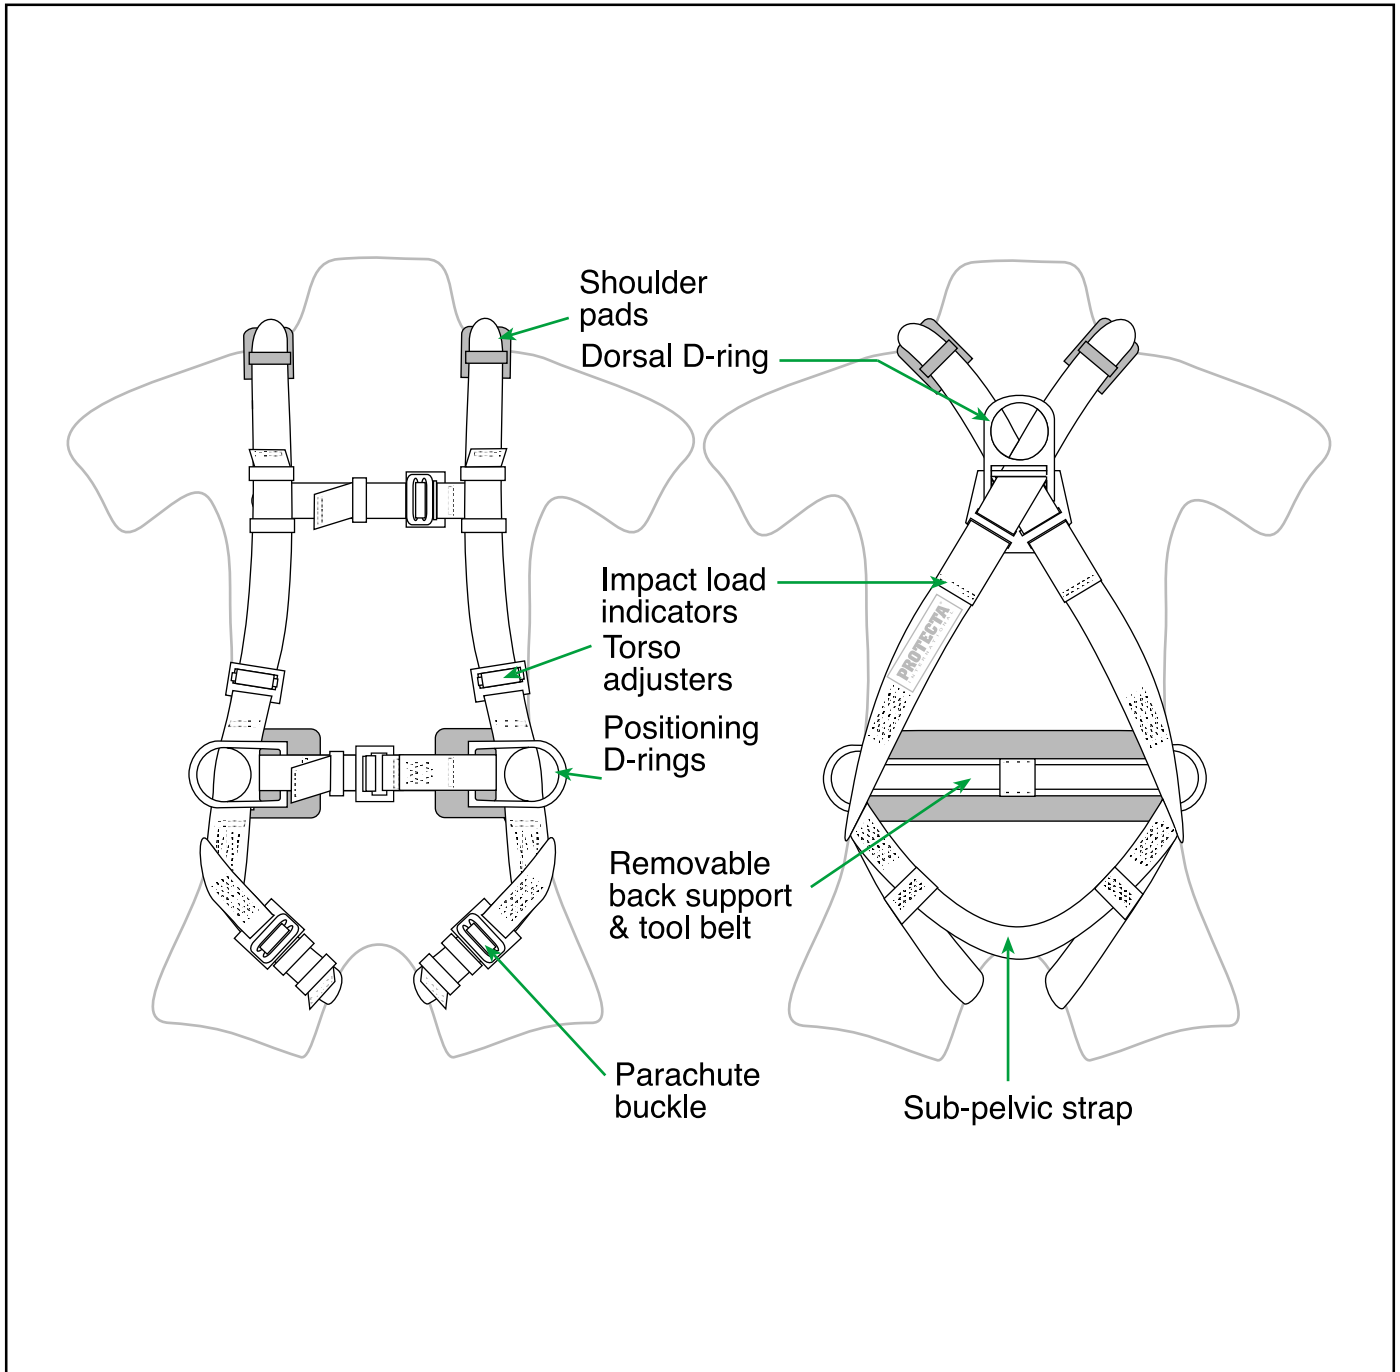

The AB104A13 Contractor's Model Full-Body Harness is designed for heavy-duty contractor use. The field-tested, comfortable design incorporates a unique leg closure system that minimizes binding and an integrated tool belt that can be fitted with pouches, tools, wire wheels, and other accessories without folding the belt web over. Back support and work positioning is also integral to the friction lock waist belt assembly. The harness is multicolored (hi-vis green and black) for ease of donning, and the sliding back D-ring and sub-pelvic strap allow for greater comfort when arresting a fall. Sewn-in impact load indicators provide a point of reference for visual inspection. Positive parachute buckle fasteners and torso adjusters provide a personalized fit. The AB104A13 meets or exceeds all applicable OSHA regulations and provisions of the American National Standards Institute.

FEATURES

- 1-3/4" wide nylon straps (polyester or Kevlar™ available)
- Sliding back D-ring-shock absorbing design
- Integrated padded back support/tool & accessory belt with friction lock closure
- Sub-pelvic strap offers greater support while arresting a fall
- Standard and Extra-Large sizes
- High visibility green with black sub-pelvic strap
- Exclusive leg strap design for minimal binding when stooping or squatting for extended periods
- Shoulder pads for added comfort
- 4.54 lbs. total weight
- Two side D-rings for positioning
- Sewn-in load indicators provide immediate visual inspection point
- Three parachute buckle closure points for 100% closure
- Torso adjustments for personalized fit.
- Individual Serial Number for issuance and traceability
- Full compliance with OSHA 1910/1926 and ANSI Z359.1-1992 Standards
- Designed for both male and female use
