AK105A

**Confined Space
 Tripod-8'**

The AK105A Confined-Space Entry & Retrieval Tripod is designed to facilitate safe entry and retrieval from spaces which are not designed for continuous human occupancy. Extremely easy to set up, the AK105A Tripod is used in conjunction with an AK200 Series Winch, the AK010A1 Pulley, and in most cases an AD Series Self-Retracting Lifeline (or other fall-arrest device) and a full-body harness to provide complete protection for confined-space entrants.

FEATURES:

- Four eye-bolt anchors in head (3@ .63" i.d., 1@1.15" i.d.)
- 39 lbs. overall weight
- Leg position lock in tripod head
- Adjustable leg-position cable
- Multiple safety pin locks on each leg
- One-man setup
- Winch is installable on any leg
- Adjustable to eight different heights
- 65" overall height when fully retracted
- Anodized/cast aluminum construction
- Reflective safety tape on legs
- Single anchorage point rated at 5,000 lbs.
- Skid-proof tread plate soles on feet
- Meets OSHA 1910 & ANSI Z359.1-1999 standards for confined-space entry devices

PART NUMBER : AK105A

DESCRIPTION : Confined Space Tripod-8'

Leg Position	Height (of Center Eye)	Dist. Between Legs	Diameter Spanned
8	7' 6"	93"	84"
7	7'	87"	79"
6	6' 6"	83"	75"
5	6' 1"	77"	70"
4	5' 6"	71"	66"
3	5' 3"	66"	60"
2	4' 10"	60"	57"

MAXIMUM LOAD : 1,100 lbs. Rated as 5,000 lbs. anchorage point

WEIGHT : 39 lbs.

CONSTRUCTION : Epoxy coated anodized & cast aluminum

COMPLIANCE : OSHA 1910, ANSI Z359.1-1999

OTHER : One man setup. Winch is installable on any leg-no tools required for setup of tripod or installation of winch/pulley
